INTERAVIA

World Review of Aviation and Astronautics

Contents for Year 1963

GENERAL SUBJECTS

No. 1 **Turbines for Propellers and Rotors**
The SAAB 37 Single-seat Combat Aircraft
Slush on Runways
NASARR for the F-104G

No. 2 **Vertical Take-off**
Transall C-160

No. 3 **Italy's Aircraft Industry**
Limitations to Underwater Strategy
Sweden's Electronics Industry

No. 4 **Automatic Flight Control**
Canada's Electronics Industry
The Boeing 727

No. 5 **Electronic Shields against Air Attack**
By-pass and Fan Engines for Economy

No. 6 **The French Aerospace Industry**
Other European Programmes and Projects
NASA Satellite Tracking Network

No. 7 **Paris Show Business**
Space Age Meteorology
BAC One-Eleven

No. 8 **Airport Ground Equipment**
The F-104G—a Much-Discussed Weapon
The Equipment Manufacturers at Le Bourget

No. 9 **Helicopters for Military Mobility**
Automatic Reservation Systems
The Orion Submarine Hunter

No. 10 **Air Transport Problems of Today and Tomorrow**
Operating the Future SST
Britain's Aerospace Industry

No. 11 **Aircraft in Defence Planning: USAF Reappraisal**
TFX—America's Largest Aircraft Programme
Plans for Communications Satellite Networks
Supplement: **The Trident**

No. 12 **US Space Programme in Jeopardy?**
The Transall Goes into Production
Inertial Navigation Equipment

INDEX BY SUBJECTS

1. International Organisations

Will the Atom Split NATO?: 2/167
What Will Become of the Atlantic Alliance?: 3/301
Aid and Aviation: 4/445
North America's Electronic Shield against Air Attack—C. W. Corddry: 5/582
IATA 15th Technical Conference—"Flight X will depart on Schedule": 6/725
Central Organisation for Defence (Great Britain): 8/1134
The VTOL Dilemma: 9/1313
IATA's 19th Annual General Meeting in Rome—N. Carandini: 10/1481
IATA's 91th Annual General Meeting: 11/1671
IFALPA Supersonic Symposium: 12/1811

2. Defence and Political

Bolt from the Sky: 1/20
US Military and Space Funding: A Peacetime Record: 2/149
Will the Atom Split NATO?: 2/167
Polaris for Europe: 3/275
What Will Become of the Atlantic Alliance?: 3/301
Can the Missile Submarine Remain Invulnerable?: 3/321
Preparing the "Force de Frappe": 4/420
Aid and Aviation: 4/445
Britain's Alternative Defence Policies: 4/454
Sharing the Risk: 5/581
Budgets and Business: 6/793
British Weapons Policy and Europe—D. Wood: 6/819
Central Organisation for Defence (Great Britain): 8/1134
The Helicopter in British Defence Thinking—D. M. Davies: 9/1318
Manned Aircraft in Defence Planning: USAF Reappraisal: 11/1689
IFALPA Supersonic Symposium: 12/1811
Space is No Preserve of Peace: 12/1829
Striking While the Iron Is Hot: 12/1811
Exercise Big Lift: 12/1814

3. Civil Aviation

A Die Is Cast: 1/47
Ethiopia 1963—D. V. Davies: 1/101
Aid and Aviation: 4/445
Meteorology in the Service of Civil Aviation—A. Viaut: 5/563
The Shadow of the SST: 5/650
Minority Rule: 6/708
IATA's 15th Technical Conference—"Flight X will depart on Schedule": 6/725
Intercontinental Concorde: 7/982
American Airlines buys BAC One-Elevens: 8/1134
Extra-short Haul: 9/1296
Will Fare Reductions Fill Empty Seats?: 9/1296
The Costs of Crew Promotion: 9/1296
Worldwide Aerial Work Operations—S. Hulse: 9/1400
John Smith Must Wait: 10/1462
A Year of Cold War over the Atlantic: 10/1462
Lessons from Statistics?: 10/1479
Alitalia's Position as a World Airline: 10/1481
Pillars of World Air Transport—A "Who's Who" of the International Air Transport Association: 10/1491
The SST—an Undemocratic Proposition—Demophilos: 10/1499
Implications of High Speed Operations: 10/1502
Amphibious Aircraft in Amazonia: 10/1572
Why We Decided on the Trident—A. H. Milward: 11/1616
The Airline Engineer's Assessment (Trident)—B. S. Shenstone: 11/1617
IATA's 19th Annual General Meeting: 11/1671
World Air Transport's Bill of Health—IATA Director General's Annual Report: 11/1672
IFALPA Supersonic Symposium: 12/1811
India's International Airline: 12/1901

4. Service Aviation

Will the Atom Split NATO?: 2/167
Technical and Tactical Aspects of the VTOL Strike Aircraft—Interavia Study Group: 2/172
What Will Become of the Atlantic Alliance?: 3/301
Can the Missile Submarine Remain Invulnerable?: 3/321
Weapons to Counter the Submarine: 3/330
Preparing the "Force de Frappe": 4/420
Aid and Aviation: 4/445
Britain's Alternative Defence Policies: 4/454
Sharing the Risk: 5/581
Ground Environment Systems for Air Defence: 5/582
North America's Electronic Shield against Air Attack—C. W. Corddry: 5/582
NORAD Early Warning Stations: 5/586
Air Weapons Control System 412L: 5/590
Litton's MODICON Concept: 5/592
Tactical Air Weapons Control, An Advanced Ground Environment System—N. A. Begovich: 5/594
Fire Brigade—The R.A.F. Fighter Control System: 5/597
A Military Booster Rocket—TITAN 3: 5/598
British Weapons Policy and Europe—D. Wood: 6/819
Space Age Weathermen—Brig.-Gen. R. W. Nelson, Jr.: 7/1040
The Royal Danish Air Force—C. C. Brunckhorst: 7/1074
Central Organisation for Defence: 8/1134
The VTOL Dilemma: 9/1313
Helicopters Boost Battlefield Mobility: 9/1314
The Helicopter in British Defence Thinking—D. M. Davies: 9/1318
Manned Aircraft in Defence Planning: USAF Reappraisal: 11/1689
New Missions for the US Air Force: 11/1690
TFX—The Story behind America's Largest Aircraft Programme: 11/1694
Massive Close Support: 11/1697
Exercise Big Lift: 12/1874

5. Aircraft

a) Civil Aircraft

Europe Bids for the SST Market—Anglo-French Concord: 1/29
A Die Is Cast: 1/47
Towards the American SST: 2/150
What about the DC-3 Successor?: 3/333
A New Aeroplane for a New Market—D. Lockspeiser: 3/347
Short Skyvan: 3/377
Three Engines for Medium-haul—The Boeing 727 Jetliner: 4/446
Two New Caravelles: 4/451
The Sperry SP-50 for the Boeing 727: 4/461
DC-9—Douglas Re-enters Short-haul Field: 5/564
The Shadow of the SST: 5/650
BAC One-Eleven: Production Gains Momentum: 5/656

New German Projects—Three Messerschmitt Proposals (Me P 308 Jet-Taifun, Me P 141, Me P 160): 6/706
The SIAT 311 A STOL multi-purpose aircraft: 6/706
Weser Flugzeugbau: WFG-P 23, WFG-P 16, WFG 614: 6/707
The Mystère 20—Latest Competitor in the Executive Field: 6/782
Signs of Concord: 6/789
De Havilland DH.121 Trident—Low Costs and Jet Comfort for Short-haul: 6/821
Development of the HFB 320 Hansa: 6/832
FW 260, FW 300—Two Focke-Wulf VTOL Projects: 7/979
Intercontinental Concorde: 7/982
A Glimpse of the Future—Models at Le Bourget: 7/1004
The BAC One-Eleven—Jet Power for Short Haul: 7/1068
The BAC Hunting H.126 Jet Flap Aircraft: 7/1073
American Airlines buys BAC One-Elevens: 8/1134
Basic Aircraft for Basic Needs: 8/1151
The Design of the Concorde: 8/1185
Fokker F.28—An Economic Short-haul Transport: 8/1188
Navigational Problems of Supersonic Airliners—W. L. Polhemus: 10/1484
The SST, an Undemocratic Proposition—Demophilos: 10/1499
The SST Environment—Implications of High Speed Operations: 10/1502
Can We Survive Supersonic Travel?—J. Makowski: 10/1504
Short-haul Design Considerations—J. R. McGowen: 10/1506
A New Twin-jet Transport—The Douglas DC-9: 10/1507
Trident—Regional Jet Airliner for a New Era—J. P. Smith: 11/1605 (Supplement)
Trident—Systems Simplicity: A Major Design Goal: 11/1609 (Supplement)
Trident—Operational Performance: 11/1612 (Supplement)
Why We Decided on the Trident—A. H. Milward: 11/1616 (Supplement)
Trident—The Airline Engineer's Assessment—B. S. Shenstone: 11/1617 (Supplement)
Trident Test Flight—A Pilot's Evaluation—E. K. Barnes: 11/1620 (Supplement)
The Breguet 941 STOL Transport: 11/1756
Europe's Supersonic Transport Progresses: 12/1880
The American SST: Situation Report: 12/1899
A Civil Freight Version of the Transall: 12/1913

b) Military Aircraft

Public Relations for the Starfighter's Electronics: 1/86
The NASARR System for the F-104G: 1/88
Sweden's System 37 for Attack, Reconnaissance, Interception—Three-forked Lightning: 1/109
New Profiles in Flight: 2/175
Some VTOL Aircraft and Projects: 2/174
Two Revolutionary European Aeroplanes (Hawker P.1127 and Dassault Balzac): 2/176
The American Forces' VTOL projects: 2/194
Some US Experimental VTOL Vehicles: 2/197
Tip Turbine Fans for VTOL Propulsion—B. H. Rowe: 2/198
The Franco-German Military Transport Transall C.160: 2/215
US Military Aircraft: New Designations: 2/226
C-141A Starlifter Construction: 3/312
The Grumman S2F-3 Tracker—A Modern Anti-submarine Warfare Aircraft: 3/323
"The Fabulous Hundred-Eyed Argus . . ."—J. Fricker: 3/328
Flight Test Instrumentation for the Belfast—W. Fletcher: 3/370
A STOL Tactical Transport for the R.A.F.: 4/419
The TFX: America's Latest Fighter-bomber: 4/419
A Canard Interceptor for Mach 3: 4/514
The MH-97G Flight Control System—D. Strese: 4/463
Development of the Bell X-22A—V. B. Paxhia and E. Y. Sing: 5/658
New German Projects: Weser Flugzeugbau: WFG-P 23, WFG-P 16, WFG 614: 6/707
The Mirage Assembly Line: 6/784
The Fiat G.91T: 6/826
A Multi-purpose Jet Trainer, The Canadair CL-41—C. W. Corddry: 6/854
The VJ101C VTOL Fighter: 6/910
Two Fiat V/STOL Projects: 7/961
A Glimpse of the Future—Models at Le Bourget: 7/1004
The SAAB 105: Training and Ground Attack: 7/1046
A Closer Look at the VJ101C: 7/1076
New Jet Trainers in Eastern Europe: 7/1080
Basic Aircraft for Basic Needs: 8/1151
Four Countries Build the Super Starfighter: 8/1192
F-104G—A Much-discussed Weapon: 8/1196
The VTOL Dilemma: 9/1313
Helicopters Boost Battlefield Mobility: 9/1314
The Helicopter in British Defence Thinking—D. M. Davies: 9/1318
Turbine-powered Helicopters on Active Service: 9/1325
Principal Military Turbine-powered Helicopters: 9/1326
The Bell UH-1D Iroquois: 9/1331
The Aerogyro—Lockheed's Rigid Rotor Concept: 9/1338
Forerunner to a Mach 2 VTOL fighter (Balzac): 9/1370
Orion versus the Submarine: 9/1392
Aircraft for Local Conflicts: 9/1397
TFX—The Story behind America's Largest Aircraft Programme: 11/1694
The McDonnell Phantom II: 11/1698
Progress on the Ryan XV-5A: 11/1733
The Breguet 941 STOL Transport: 11/1756
First Details of the TSR.2: 12/1873
The Transall Goes Into Production: 12/1908
The Douglas CX-4: 12/1908

6. Guided Missiles and Rockets

Rockets, Missiles, and Space Vehicles: 1/105, 2/225, 3/375, 4/506, 5/661, 7/1066, 8/1191, 10/1574, 11/1736
Sergeant Takes the Field: 2/201
Polaris for Europe: 3/275
Intensive ASW Research Effort: 3/321
Weapons to Counter the Submarine—P. Cohen: 3/330
TITAN 3: 5/598
New US Guided Missile Ships: 5/652
S.E.R.E.B. and the "Diamant" programme: U.S.-European Collaboration in the Space Field—Interview with M. Cristofini: 6/792
The US Aerospace Industry Today: 6/815
The MATRA R.530 Air-to-Air Missile: 6/857
Seacat Enters Service: 6/901
Space and Missiles: 7/1010
Soviet Warships as Missile Platforms: 8/1230
The French Aerospace Industry and the Government's Interim Plan: 9/1295
Hawk—NATO's Standard Field AA Missile: 9/1389
M 20—New Swedish Naval Missile System: 12/1897

7. Powerplants

Prospects for the Turboprop—F. R. Banks: 1/47
Turbines for Shaft Power: 1/49
Some Turboprops of Today: 1/52
Particulars of Some Turboprops: 1/54
A Versatile Free Turbine Engine—J. M. Fernberger: 1/57 (G.E. T64)
The Rolls-Royce Dart—K. T. Fulton: 1/60
Propellers for Turboprop Engines—P. Bellière: 1/67
Propellers for the Dart Engine—F. G. Fairhurst: 1/69
New Developments at Hamilton Standard: 1/72
Applications of the Lift Jet—G. L. Wilder: 2/180
Tip Turbine Fans for VTOL Propulsion—B. H. Rowe: 2/198
Some Problems Associated with High Mach Number Air Breathing Powerplants—J. G. Keenan: 3/345
De Havilland Propellers for the Tyne: 3/372
Dual-flow Engine Design: 1963: 5/612
Subsonic and Supersonic Turbofans for the Future: 5/614
Development of the Rolls-Royce Spey By-pass Jet—E. Eltis: 5/625
The Rolls-Royce Conway RCo.42 by-pass engine: 5/627
By-pass and Fan Engine Progress: 5/628
Turbofan Development at Pratt & Whitney: 5/630
The Aubisque By-pass Engine for Light Aircraft—J. Szydlowski: 5/631
Nine Tons of Thrust: The TF-106: 5/632
Around the Engine Stands: 7/1008
Design Philosophy of the Spey—D. McLean: 11/1613

8. Electronics

Research and Production News: 1/94, 2/221, 3/361, 5/645, 6/891, 7/1063, 9/1357
Public Relations for the Starfighter's Electronics: 1/86
The NASARR System for the F-104G: 1/88
Television as a Landing Aid: 1/91
Sweden's System 37 for Attack, Reconnaissance, Interception—Three-forked Lightning: 1/109
Progress in Autostabilisation: 2/187
Flight Control Systems for VTOL Transport Aircraft: 2/188
Navigation Systems for VTOL Aircraft—A. W. Duguid: 2/191
"Shoot on Sight": 2/220
Sweden's Electronics Industry: 3/364
Doppler Techniques for Miss-Distance Indicating Systems—A. B. Przedpelski: 3/368
Automatic Flight Control—Autopilot development and operation: 4/457
The Sperry SP-50 for the Boeing 727: 4/461
The MH-97G Flight Control System—D. Strese: 4/463
Microminiaturized Autopilot Design—E. W. Velander: 4/466
A British Autopilot for Helicopters—F. G. Cook: 4/477
The Collins Flight Director and Autopilot—Automatic Landing is the Goal: 4/479
Press-button Control for Executive Aircraft: 4/481
Electronics in Aviation and Industry—Canada's Growing Electronics Industry: 4/493
Automatic Control for Every Need: 4/500
Avionics in Belgium, COBELDA: 4/513
DME in Europe: 4/514
Ground Environment Systems for Air Defence: 5/582
North America's Electronic Shield against Air Attack—C. W. Corddry: 5/582
NORAD Early Warning Stations: 5/586
Air Weapons Control System 412L: 5/590
Litton's MODICON Concept: 5/592
Tactical Air Weapons Control, An Advanced Ground Environment System—N. A. Begovich: 5/594
Fire Brigade—The R.A.F. Fighter Control System: 5/597
A Directional UHF Glide Slope System: 5/600
Localizer Equipment at Cologne-Bonn Airport—W. Feyer: 6/894
Terrain Avoidance in Zero Visibility: 7/1065
The "General H. H. Arnold" Seaborne Tracking Station: 8/1166
Aerospace Electronics at the Paris Salon: 8/1217
WORTAC: Dynamic Radar Tester—K. D. Mills: 9/1359
Automatic Airline Seat Reservation: 9/1362
Airline Reservation Systems—in Use and Planned: 9/1364
RESERVEC—a New Automatic Booking System: 9/1366
Instamatic Booking with UAL: 9/1368
The International Exhibition of Transport and Communications 1965—J. F. G. Grosser: 9/1372
Elliott-Automation: a Versatile Electronics Group: 10/1542
Development and Flight Test of Precision VOR—E. R. Hollm and R. B. Flint: 10/1545
Plans for Satellite Communications Networks: 11/1721
Communications Satellites Already Launched: 11/1722
Ground Stations for Communications Satellites: 11/1727
Communications Satellite Ground Stations (table): 11/1729
Selenia Radar for Air Traffic Control: 11/1734
Electronics for Civil Aviation—Research and Development in Great Britain: 11/1761
Modern Inertial Navigation Techniques—B. Lichtenstein: 12/1865
Space Age Catalogue (V): 12/1868

9. Astronautics

Rockets, Missiles, and Space Vehicles: 1/105, 2/225, 3/375, 4/506, 5/661, 7/1066, 8/1191, 10/1574, 11/1736
International Satellite Report: 4/410
TITAN 3: 5/598
Can Man be Modified?—T. Freedman and G. S. Linder: 5/654
The French Space Programme—R. Aubinière: 6/790
S.E.R.E.B. and the "Diamant" programme—U.S.-European Collaboration in the Space Field—Interview with M. Cristofini: 6/792
The US Aerospace Industry Today: 6/815
The Gemini Two-Man Spacecraft: 6/898
The Eyes and Ears of NASA—Satellite and Spacecraft Tracking: 6/902
German Space Research Satellites: 6/909
The Soviet Dual Space Flight: 7/962
A Day and a Half in Space—Mercury MA-9 Flight: 7/980
Some Reflections of the French Space Effort: 7/981
Space and Missiles: 7/1010
Fourth Congress of the World Meteorological Organisation—Meteorology and Space: 7/1031
The Weather from Above: 7/1036
Space Age Weathermen—R. W. Nelson Jr.: 7/1040
The French Aerospace Industry and the Government's Interim Plan: 9/1295
Plans for Satellites Communications Networks: 11/1721
Communications Satellites Already Launched: 11/1722
Ground Stations for Communications Satellites: 11/1727
Communications Satellite Ground Stations: 11/1729
Space is No Preserve of Peace?: 12/1829
America Revises her Apollo Programme: 12/1830
The Apollo Spacecraft Takes Shape: 12/1835
Rendezvous in Space—Gemini to Apollo: 12/1842
Controlled Descent from Space: 12/1844
American Unmanned Spacecraft: 12/1849
Space Age Catalogue (V): 12/1853

10. Non-electronic Equipment

Equipment-Materials-Techniques: 1/96, 2/218, 4/505, 5/648, 6/896, 11/1753
Propellers for Turboprop Engines—P. Bellière: 1/67
Propellers for the Dart engine—F. G. Fairhurst: 1/69
New Developments at Hamilton Standard: 1/72
De Havilland Propellers for the Tyne: 3/372
The Paris Equipment Show in Retrospect: 8/1223
The French Equipment Industries' Shop Window: 8/1223
Paris Salon—Around the Visitors' Stands: 8/1227

11. Airports and Airport Equipment

Take-off under Slush Conditions—M. Straud: 1/98
Ethiopia 1963—D. V. Davies: 1/101
Washington's New Airport: 2/206
Localizer Equipment at Cologne-Bonn Airport—W. Feyer: 6/894
Airport Engineering: 8/1133
Ground Operations—Airport Equipment and Facilities: 8/1152
First International Airport Equipment Exhibition: 8/1154
The Inventory of a Modern Airport: 8/1157
Passenger Handling: Today and Tomorrow—H. Süssenguth: 8/1233
Fuelling Installations for Jet Aircraft: 8/1235
Compensation of Deviation in Aircraft Compass Systems—R. Bernotat: 8/1238

12. Research and Technical

VTOL Techniques 1963: 2/168
The Future of V/STOL Aircraft—C. H. Zimmerman: 2/170
Technical and Tactical Aspects of the VTOL Strike Aircraft—Interavia: 2/172
Applications of the Lift Jet—G. L. Wilder: 2/180
Progress in Autostabilisation: 2/187
The American Forces' VTOL projects: 2/194
Tip Turbine Fans for VTOL Propulsion—B. H. Rowe: 2/198
The Challenge of Progress in Electronics—Dr. E. W. Engstrom: 2/223
C-141A StarLifter Construction: 3/312
Some Problems Associated with High Mach Number Air Breathing Powerplants—J. G. Keenan: 3/345
Flight Test Instrumentation for the Belfast—W. Fletcher: 3/370
Dual-flow Engine Design: 1963: 5/612
Subsonic and Supersonic Turbofans for the Future: 5/614
Development of the Rolls-Royce Spey By-pass Jet—E. Eltis: 5/625
The Shadow of the SST: 5/650
Development of the Bell X-22A—V. B. Paxhia and E. Y. Sing: 5/658
The BAC Hunting H.126 Jet Flap Aircraft: 7/1073
A Closer Look at the VJ101C: 7/1076
The Derschmidt Rotor: 9/1335
The Aerogyro: Lockheed's Rigid Rotor Concept: 9/1338
Navigational Problems of Supersonic Airliners—W. L. Polhemus: 10/1484
The SST, an Undemocratic Proposition—Demophilos: 10/1499
Can We Survive Supersonic Travel?—J. Makowski: 10/1504
The Advantages of Flight Recorders on Transports—M. Bellonte: 10/1510
Trident: Systems Simplicity: A Major Design Goal: 11/1609
Design Philosophy of the Spey—D. McLean: 11/1613
Trident—Test Flight—A Pilot's Evaluation—E. K. Barnes: 11/1620
Progress on the Ryan XV-5A: 11/1733
Compensation of Deviation in Aircraft Compass Systems—R. Bernotat: 8/1238

13. Industry

The Italian Aircraft Industry—J. de Galard: 3/302
C-141A StarLifter Construction: 3/312
What about the DC-3 Successor?: 3/333
Sweden's Electronics Industry: 3/364
Canada's Growing Electronics Industry: 4/493
Automatic Control for Every Need: 4/500
Avionics in Belgium: COBELDA: 4/513
BAC One-Eleven: Production Gains Momentum: 5/656
The French Aeronautical Manufacturers in 1963—J. de Galard: 6/762
ABC of the French Equipment Industry: 6/769
The Mirage Assembly Line: 6/784
The French Aeronautical Industry—Its Current Situation and Future Prospects—L. Bonte: 6/787
The US Aerospace Industry Today: 6/815
Problems Facing the German Aircraft Industry: 6/828
Development of the HFB 320 Hansa: 6/832
Some Reflections of the French Space Effort: 7/981
The Brazilian Industry's Laborious Start: 7/1082
Four Countries Build the Super Starfighter: 8/1192
Paris Salon—The Paris Equipment Show in Retrospect: 8/1223
Paris Salon—Around the Visitors' Stands: 8/1227
The French Aerospace Industry and the Government's Interim Plan: 9/1295
Short-haul Design Considerations—J. R. McGowen: 10/1506
The British Aircraft Industry: 1963—Reorganisation Brings Greater Stability: 10/1531
Achievements of a Great Industry: 10/1535
Britain's Aerospace Management under One Roof—D. Wood: 10/1538
TFX—The Story behind America's Largest Aircraft Programme: 11/1694

14. Exhibitions, Congresses, Meetings

World Gliding Championships in the Argentine: 4/510
Airframe, Engine, and Equipment Manufacturers at the 25th Paris Salon: 6/705
The German Navigation Society's International Conference: 6/726
From Balloons to Spacecraft—The Paris Salon's Silver Jubilee: 6/761
Le Bourget 1963—The World's Largest Aerospace Show: 7/999
A Glimpse of the Future—Models at Le Bourget: 7/1004
Paris Salon—Around the Engine Stands: 7/1008
Paris Salon—Space and Missiles: 7/1010
Fourth Congress of the World Meteorological Organisation—Meteorology and Space: 7/1031
An Interview with André Viaut: 7/1034
First International Airport Equipment Exhibition: 8/1154
Aerospace Electronics at the Paris Salon: 8/1217
The Paris Equipment Show in Retrospect: 8/1223
Paris Salon—The French Equipment Industries' Show Window: 8/1223
Paris Salon—Around the Visitors' Stands: 8/1227
The International Exhibition of Transport and Communications 1965—J. F. G. Grosser: 9/1372
Genoa: 5-20 October, 1963—Italy's Tenth International Air Show: 10/1513
Electronics for Civil Aviation—Research and Development in Great Britain: 11/1761

15. Miscellaneous

INTERAVIA Air Letter Reports: 1/19, 2/139, 3/257, 4/409, 5/545, 6/727, 7/959, 8/1115, 9/1277, 10/1435, 11/1653, 12/1793
What's In The Air?: 1/83, 2/204, 3/314, 4/482, 5/609, 6/851, 7/1012, 8/1163, 9/1402, 10/1576, 11/1702, 12/1878
Book Reviews: 1/111, 2/228, 3/377, 4/515, 6/912, 7/1084, 8/1239, 9/1406, 11/1764
Readers' Letters: 2/227, 3/378, 4/515, 6/912, 7/1084, 12/1812
Intensive ASW Research Effort: 3/321
SONAR and the Fourth Dimension: 3/325
Weapons to Counter the Submarine—P. Cohen: 3/330
World Gliding Championships in the Argentine: 4/510
A Canard Interceptor for Mach 3: 4/514
Meteorology in the Service of Civil Aviation—A. Viaut: 5/563
New US Guided Missile Ships: 5/652
Can Man be Modified?—T. Freedman and F. S. Linder: 6/654
Moon's Eye View—The Weather from Above: 7/1036
Space Age Weathermen—R. W. Nelson Jr.: 7/1040
Atlantic Weather Stations: 7/1043
Soviet Warships as Missile Platforms: 8/1230
Westland's New Hovercraft: 8/1232
Accidents Are Not Inevitable: 10/1461
Fully Submerged Hydrofoils—Mechanical Methods for Incidence Control—C. Hook: 10/1563
Lycoming's New Hydrofoil Amphibian: 10/1566
Gas Turbine Patrol Boats: 10/1568
The Bell Hydroskimmer Air Cushion Vehicle: 11/1732
Rockford '63—Rally of the "Homebuilts": 11/1754
At 60 Knots on the Atlantic: 12/1904

16. Tables

Particulars of Some Turboprops: 1/54
Some VTOL Aircraft and Projects: 2/174
US Military Aircraft: New Designations: 2/226
International Satellite Report: 4/410
Airframe, Engine, and Equipment Manufacturers at the 25th Paris Salon: 6/705
ABC of the French Equipment Industry: 6/769
Principal Military Turbine-powered Helicopters: 9/1326
Airline Reservation Systems—in Use and Planned: 9/1364
Pillars of World Air Transport—A "Who's Who" of the International Air Transport Association: 10/1491
Achievements of a Great Industry: 10/1535
Communications Satellites Already Launched: 11/1722
Communications Satellite Ground Stations: 11/1729
